PROFILE

Motivated Industrial Mathematics–Computer Science student with a strong foundation in backend development and a long-term interest in cybersecurity, including ethical hacking and threat analysis. Proficient in programming, problem-solving, and analytical thinking, with growing experience in building secure, scalable backend systems. Currently seeking an internship where I can apply and expand my skills in backend development while gaining hands-on exposure to cybersecurity practices, contributing to secure system design and risk mitigation in a dynamic, tech-driven environment.

EDUCATION

Covenant University Expected September 2026
Bachelor of Industrial Mathematics-Computer Science Ogun, Nigeria
Cumulative GPA: 4.49
Relevant Coursework: Programming in C/C++, Java OOP, Computer Security, Organization of Programming Languages, Mathematical Methods, Operation Research, Theory of Computing, Mathematical Computing, Linux Systems

PROJECTS

Creator and Developer –Food Booking Web Application 📄 November 2025
Ondo Nigeria

- Built a full-stack food ordering platform with Spring Boot backend and HTML/CSS/JS frontend.
- Implemented JWT authentication, role-based access, and multi-store real-time order tracking.
- Deployed the application to AWS EC2, configuring security groups and server environment for production access.
- Currently serving over 500 active users

Technologies: Java, Spring Boot, HTML, CSS, JavaScript, JWT, MySQL, Clever Cloud, Docker, AWS(EC2)

AlphaPulse — Real-Time Investment Intelligence & Portfolio Platform August 2026 – Present
Ondo State, Nigeria

- Built REST APIs for market data, technical indicators, trading signals, watchlists, and portfolio management.
- Implemented secure authentication, portfolio valuation, and real-time price updates using Supabase and WebSockets.
- Developed a robust backend with external market-data integrations and 500+ automated tests.

Technologies: TypeScript, NestJS, Supabase, PostgreSQL, Socket.IO 📄

File Storage API (Dropbox-inspired) December 2025
Ondo, Nigeria

- Developed a RESTful file storage API inspired by Dropbox, enabling users to upload, download, organize, and search files.
- Implemented shareable links with configurable expiration for secure, time-limited file access.
- Integrated Cloudinary for cloud-based file storage and used MongoDB for metadata and access management.

Technologies: Java, Spring Boot, MongoDB, Cloudinary, REST APIs

VOLUNTEERING

Mathematica Project June 2024
Head Programmer

- Used Mathematica to generate graphical representations of exchange rate trends.
- Led a team in analyzing Naira to Dollar exchange rate fluctuations using the Lagrange interpolation model.
- Developed and implemented algorithms in Mathematica for predictive modeling.
- Presented data-driven insights to improve financial forecasting accuracy.

SKILLS

Programming languages — Python, C#, C++, C, Java, HTML, CSS, JavaScript

Operating Systems — Windows, Linux, MacOS

Tools and Technologies — Wireshark, Splunk, Linux, Spring Boot, MySQL, GitHub, Postman, REST APIs, JWT, IntelliJ IDEA, VS Code, Render, Railway, Netlify, Tailwind CSS, DBeaver, PostgreSQL, MongoDB, React, TypeScript, Vnext, Supabase, Google OAuth 2.0, Mailgun API.

Cloud & DevOps — Google OAuth 2.0, AWS EC2, Docker, Render, Supabase, Railway, Netlify, Vercel, Cloudflare Workers, Git/GitHub, CI/CD (Cloudflare Workers Builds).

Cyber Security — Threat analysis, risk assessment, incident response, security hardening, security frameworks

CERTIFICATIONS

• Google Cybersecurity Certificate 📄
